

Environmental, Health & Safety Advisor

The EHS Advisor will be responsible for developing and implementing Environmental Health and Safety Policies and Practices, and in ensuring Ei Electronics meets its legal requirements when implementing safe work practices. They will proactively promote a positive Health & Safety environment for all employees.

The Job:

The key responsibilities of the job include:

- The EHS Advisor will be responsible for providing advice, guidance, instruction & training in all EHS matters to management & employees.
- Maintain current OHSAS18001 & ISO14001 standards in line with regulatory & corporate requirements.
- Development, implementation and maintenance of EHS practices, programmes and initiatives.
- Monitor EHS legislation and developments to ensure the Company is compliant and up to date
- Preparation and maintenance of the Safety Statement
- Identify workplace hazards and carry out risk assessments (machinery, chemical, ergonomic etc). Advise management on appropriate actions to control risks.
- Conduct regular Safety Inspections and assist management in planning corrective actions
- Design and deliver Company Health and Safety Training Programmes
- Ensure all regulatory and in-house safety training/refresher training is completed
- Oversee all Health and Safety accident/incident investigations, and close out corrective actions.
- Maintain all appropriate Health and Safety records
- Liaise with Company Doctor and OH Nurse on work-related injuries and illnesses
- Liaise with external EHS agencies (e.g HSA, EPA). Ensure compliance with all environmental licences for the facility.
- Environmental management including waste control.
- Work closely with teams such as the Emergency Response Teams and Safety Representatives
- Co-ordinate & control all aspects of radiological protection including schedules & records
- Drive a positive safety culture

The Person:

The successful candidate will ideally:

- Hold an appropriate third level qualification
- Have 4 to 5 years' experience in Health and Safety, ideally in a fast-paced manufacturing environment
- Have previous experience of EHS management systems including ISO14001, OHSAS18001 & ISO45001.
- Have excellent communication skills, with proven ability to influence at all levels in the organization.
- Have excellent time management & organizational skills with a proven ability to multi-task, effectively prioritise & meet deadlines.
- Have excellent analytical and problem-solving skills
- Display a high level of enthusiasm and energy
- Be certified as a manual handling instructor or hold a training qualification.
